

## ELECTRONIC CIGARETTE

### User Manual

#### What's in the Pack

- 1 x Vape-0 Zipper Pouch
- 1 x Clearomizer with Coil and Mouthpiece
- 1 x Rechargeable 1100 mAh Battery (6 Mth Warranty)
- 1 x USB Charger Cable
- 1 x Mixing Bottle with Stainless Steel Tip

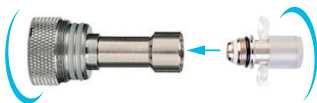

#### Please note

For safe and effective use of this device, please read through the instruction manual and follow the standard operating instructions accordingly.

The Vape-0's rechargeable battery has a lifespan of approximately 300 charge cycles. Thereafter it is recommended that you replace the battery.

#### Note: Before first use...

- Make sure that the coil is tightly screwed down before filling with e-juice.

#### Instructions for first time use

- Remove the battery from the pouch and screw into the charger cable. Plug into a USB Port or plug socket adapter (not Included) to charge and leave for 8 hours for first charge
- When plugged in, the battery light will flash and the light on the charger will be RED while charging and GREEN once fully charged. NOTE: For the first charge cycle wait the full 8 hours.
- Normal charging time is approximately 2-3 hours.
- Once the battery is fully charged disconnect it from the USB charger and screw it onto the clearomizer and prepare for filling with your favourite Vape-0 Flavour E-Liquid
- Press the button 5 times (within 2 seconds) to LOCK/UNLOCK the battery. There is a safety cut off built into the circuitry to prevent burning of the coil if button is pressed for more than 10 sec continuously. When the battery is flat the light will flash.

#### Using your Vape-0 Device

Keep your finger on the button while inhaling the vapour. Release thereafter.

**Please Note:** Remove the black mouthpiece periodically and clean excess liquid build up to avoid leakage into your mouth.

#### Maintenance

- 1) Your Vape-0 should be cleaned regularly.
- 2) Do not let the tank run dry before refilling with e-juice
- 3) Clean the threads of the various components and battery head with a clean cloth as dirt and liquid build up may hinder good electrical conduction.
- 4) With the battery removed, blow into the mouth piece to evacuate left over liquid and clean with a cloth
- 5) The Coil is a consumable component and will need to be replaced periodically depending on usage of the device. When the amount of vapour is considerably less than normal it may be as a result of the coil needing to be replaced.

#### Courtesy

Please always ask the people around you or the establishment managers for permission before using the device in public places.

## Caution

We do not accept responsibility for incorrect usage of the device and will NOT honour any warranties if damage is found to be through incorrect use or physical damage caused by dropping the device.

Please take all necessary precautions with the batteries, do not dispose of in fire or leave in direct sunlight. If during use the battery gets hot, allow it to cool before continuing use.

Do not leave plugged into charger overnight or for extended periods Unnecessarily.

## FAQ & Troubleshooting Tips

**Little or No Vapour:** Possible reasons include, Low or Flat Battery, Worn out coil, liquid or foreign substances on the battery preventing conduction.

**No light on battery:** Possible reasons include, press the button 5 times (within 2 seconds) to check if it may be locked, the battery is flat (plug in & charge). If still no light contact Vape-O for a replacement if under warranty. Damage to battery is not covered by warranty.

**Liquid on battery:** Liquid on battery: Remove clearomizer (tank) from battery, dry any liquid from the top of the battery terminal. Empty the clearomizer tank, disassemble the clearomizer parts and rinse in warm water. Blow through the post and dry any excess water or liquid. Allow all parts to dry and then reassemble. Refill with e-juice and continue enjoying your Vape-O device..

## Charging the Battery

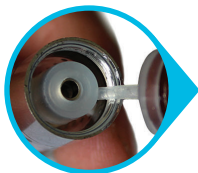

- Screw the battery onto the USB charging cable and plug into a USB port or Cellphone Charging Adapter.

## Filling with E-juice

- Unscrew top Ring.
- Place needle tip down the side of the tank to fill.
- Do not fill past the 1.6mm mark.

Unscrew Top Ring and hold the tank at a 45° angle. Place needle tip into the tank and pour liquid taking care not to pour into the centre of the Coil and post. Do not overfill, see tank glass for max & min markers. Once filled wait a minute before using it to allow the e-juice to be absorbed into the coil.

**PLEASE NOTE: DO NOT FILL IN THE CENTRE HOLE**

## Changing the Coil

- Unscrew bottom ring to remove post.
- Unscrew COIL from post and replace with a new COIL.
